

U Opštoj bolnici „Dr Aleksa Savić“ završeni su radovi na proširenju smeštajnih kapaciteta i renoviranju Odeljenja neurologije a u toku su radovi na rekonstrukciji mokrih čvorova, vodovodne i kanalizacione mreže na Odeljenjima oftalmologije i pedijatrije.

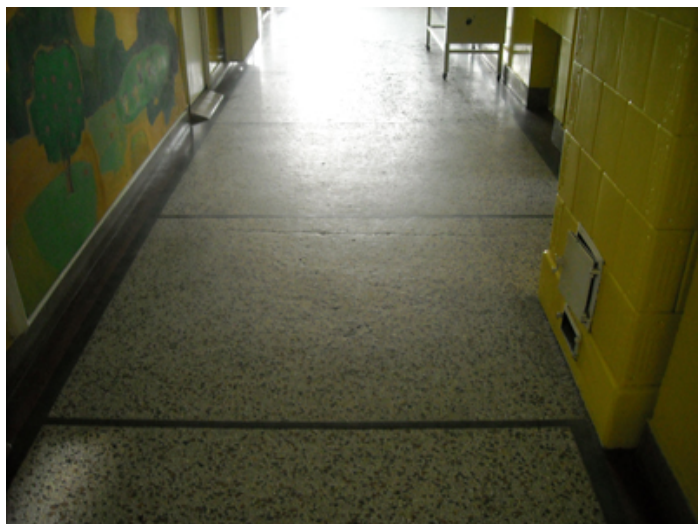

Nakon više od 40 godina renoviran je prostor za EEG i ENMG (elektroencefalografija i elektromioneurografija) preglede na Odeljenju neurologije, prošireni su smeštajni kapaciteti za još jednu bolesničku sobu, otvoren je novi ulaz sa rampom zbog lakšeg i bržeg transporta pacijenata na dalju dijagnostiku, renoviran mokri čvor.

- Iako je nabavljena nova medicinska oprema, prostor u kome se obavljali pregledi je bio jako neuslovan. Tokom prethodna dva meseca renoviran je prostor za EEG i EMNG preglede, čime su napravljeni mnogo bolji uslovi za pacijente i omogućen kvalitetniji rad medicinskih radnika - rekao je dr Zoran Jović, načelnik Odeljenja neurologije (na slici).

Radovi na odeljenjima neurologije, oftalmologije i pedijatrije

Kidney and the other organs of the body are located in the abdominal cavity. The abdominal cavity is divided into four quadrants by two imaginary lines: a vertical line passing through the midline and a horizontal line passing through the umbilicus. The quadrants are labeled as follows: Right Upper Quadrant (RUQ), Right Lower Quadrant (RLQ), Left Upper Quadrant (LUQ), and Left Lower Quadrant (LLQ). The abdominal cavity is also divided into nine regions by two additional lines: a vertical line passing through the midline and two horizontal lines passing through the umbilicus and the xiphoid process. The regions are labeled as follows: Right Upper Region (RUR), Right Middle Region (RMR), Right Lower Region (RLR), Left Upper Region (LUR), Left Middle Region (LMR), Left Lower Region (LLR), Central Upper Region (CUR), Central Middle Region (CMR), and Central Lower Region (CLR). The abdominal cavity is also divided into four quadrants by two imaginary lines: a vertical line passing through the midline and a horizontal line passing through the umbilicus. The quadrants are labeled as follows: Right Upper Quadrant (RUQ), Right Lower Quadrant (RLQ), Left Upper Quadrant (LUQ), and Left Lower Quadrant (LLQ). The abdominal cavity is also divided into nine regions by two additional lines: a vertical line passing through the midline and two horizontal lines passing through the umbilicus and the xiphoid process.
